VISIBLE RESULTS
in **3** days

Flexitol™ Hand Balm

For very dry hands

Flexitol Hand Balm: Proven Efficacy

In a controlled 14 day trial, 20 subjects suffering from very dry and rough hands applied **Flexitol Hand Balm** twice daily.

Results indicate that regular use of **Flexitol Hand Balm** increases the mean hydration levels in the skin and thus helps keep hands healthy and well moisturized.¹

¹ Study conducted by the Dermal Consult Group in Germany

Flexitol Hand Balm: Proven to moisturise and relieve severely dry hands associated with different dermatological skin condition

In a controlled 14 days trial, 49 subjects (nurses) suffering from dermatological conditions including but not restricted to showing visible signs on the hands such as Eczema, Psoriasis, ichthyosis and dermatitis applied **Flexitol Hand Balm** at least three times a day to washed & towel dried hands.

Results indicated that **Flexitol Hand Balm** significantly increases hand moisture levels and reduces the dermatological symptoms associated with severely dry hands.²
